RADON INFORMATION SPEAKER'S BUREAU

Radon: A Growing Concern

The NEHA National Radon Proficiency Program has established a Speakers Bureau comprised of individuals who have received training in the delivery of short public information programs regarding radon. Greg Justice, Licensed with the NRPP has been trained and certified to provide one hour presentations concerning Radon

NEHA-NRPP 103541 RT

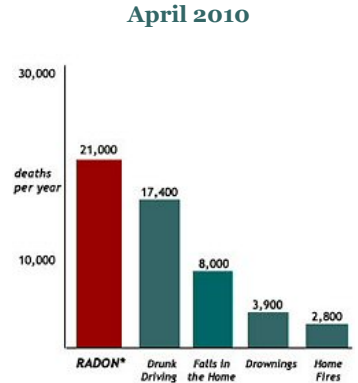

**These classes can provide CE credits for the
Real Estate Professional.**

**Please call 1-888-414-4107 to schedule the
Presentation**

Americans Urged to Test for Radon

Surgeon General Releases National Health Advisory On Radon

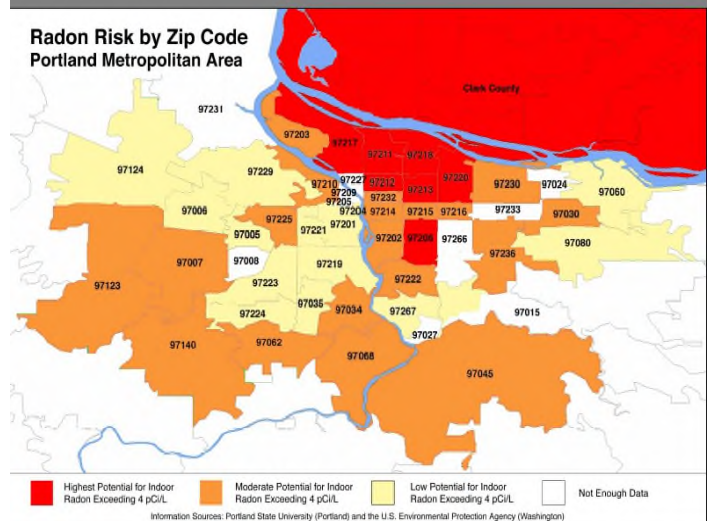

U.S. Surgeon General Richard H. Carmona warned the American public about the risks of breathing indoor radon by issuing a national health advisory today. The advisory is meant to urge Americans to prevent this silent radioactive gas from seeping into their homes and building up to dangerous levels. Dr. Carmona issued the advisory during a two-day Surgeon General's Workshop on Healthy Indoor Environment. "Indoor radon is the second-leading cause of lung cancer in the United States and breathing it over prolonged periods can present a significant health risk to families all over the county," Dr. Carmona said. "It's important to know that this threat is completely preventable. Radon can be detected with a simple test and fixed through well-established venting techniques." Radon is an invisible, odorless and tasteless gas, with no immediate health symptoms, that comes from the breakdown of uranium inside the earth. Simple test kits can reveal the amount of radon in any building. Those with high levels can be fixed with simple and affordable venting techniques. According to U.S. Environmental Protection Agency (EPA) estimates, one in every 15 homes nationwide have a high radon level at or above the recommended radon action level of 4 pCi/L per liter of air.

**Radon is a leading cause
of Lung cancer**

Knowledge is Power
